

SOLAR HEAT, *it's the right thing to do ...*

GO SOLAR - GO CLEAN AND GREEN - GO SOLAR

Solar heat for water and building heating. A well designed four-season solar system can provide up to 50% of the annual hot water and building heating energy needs.

Incentives are available, such as ecoEnergy and Ontario Solar Thermal Heat Initiative (OSTHI).

Please check incentive program specifics, see the incentive page at our website.

ABOUT US

www.GreenSunRising.com

Green Sun Rising Inc. is a Windsor Ontario based company, focusing on supplying solar heat collectors and solar heat systems. We are also working on clean and efficient biomass burner systems.

Our products are European engineered and designed, using the solar know-how and experience of over 25 years of our European partner companies. Presently, our products are "Made in Germany" and imported into North America.

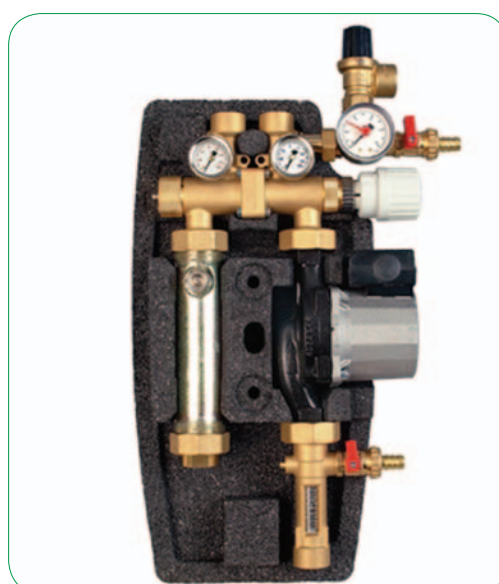

- *We offer premium products with intelligent solutions, at a fair market price.*
- *We strive to provide customer focus and quality support.*
- *We plan to produce locally in North America, in the near future.*
- *We welcome your suggestions and improvement ideas, as we believe in continuous improvement.*
